

# Variation in tree swallow egg shape.

Conor C. Taff

**Figure 1:** Morphospace of tree swallow egg shape from all measured eggs. Ellipse indicates the region containing 95% of eggs.

## ``summarise()`` has grouped output by 'year', 'unit\_box'. You can override using the ```.

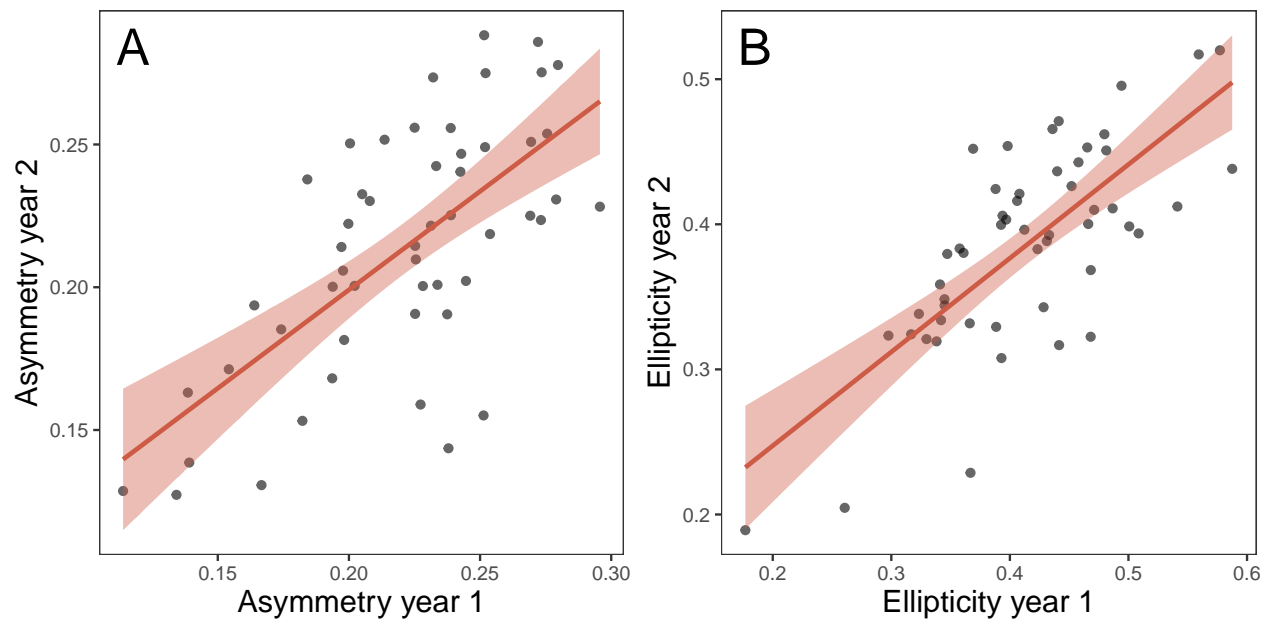

**Figure 2:** Average egg asymmetry (A) and ellipticity (B) of recruited female tree swallows banded in our population and that of their previously measured mothers.

## INTRODUCTION

## METHODS

## RESULTS

## DISCUSSION

**Figure 3:** Average asymmetry (A) and ellipticity (B) for females that had egg shape measurements in consecutive years.
